An Assistant Lecturer at the College of Medicine, University of Kirkuk, teaching computer courses and serving in the Secretariat of the Subcommittee for Academic Promotions. My work includes designing and developing web and mobile applications, educational platforms, virtual laboratories, and systems that automate academic and administrative processes. My interests include computer networks, cybersecurity, and artificial intelligence, with a focus on building technological solutions that support education and improve institutional efficiency.

Research interests Web and mobile application development and information systems; computer networks and network security; cybersecurity and ransomware recovery; artificial intelligence and its applications in education and health; e-learning and virtual laboratories; digital transformation and the automation of academic and administrative processes.
