I am Professor Dr. Dler Omar Mohammed, a Professor of General Surgery and Advanced Laparoscopic Surgery at the College of Medicine, Kirkuk University, Iraq. My professional expertise includes general surgery, advanced minimally invasive surgery, and bariatric surgery. In addition to my clinical practice, I'm actively involved in medical education, undergraduate surgical teaching, clinical training, and scientific research. My research interests focus particularly on bariatric surgery, surgical outcomes, postoperative complications, and the advancement of modern surgical techniques. I contributed to scientific research published in international medical journals. My research output includes three publications in Scopus-indexed journals, two publications in Clarivate-indexed journals, and five papers published in international scientific journals. Through my academic, clinical, and research activities, I committed to advancing surgical practice, improving patient outcomes, and contributing to the development of medical education and scientific research.

Research interests my research interest is in advanced laparoscopic and bariatric surgery, also in breast cancer and GIT surgery
